EMPLOYMENT TRACK RECORD

Following graduation, Carl took the decision to join a large international, multi disciplinary consultancy practice to maximise his experience in both his role and sectors. In 2002 he became a Chartered Surveyor and Project Manager with the RICS. This led to a career move within another large practice which progressed his managerial skills set. His career path then took him to a smaller regional practice before co-founding Innov8 DS in 2009 to provide a bespoke and tailored consultant service.

Carl feels his structured early years have allowed him to develop within many different sectors and assisted in developing his skills and knowledge of the industry. This allows him to deliver roles including Development Management, Project Management, QS and Fund Monitoring / Risk Management.

In addition to the hands on role within Innov8DS, Carl also undertakes the Treasurer role for a local £1m community development project and is 1st XI captain for his village cricket team
